

IMRAN MIRZA

CREATIVE PHOTOGRAPHER
& VIDEOGRAPHER

PROFILE

Working as a professional photographer for the last 12 years has given me a great deal of knowledge and experience. Being self taught has kept me learning, and I continue to learn as new technologies come into play. One of the great advantages of this is that I'm able to adapt extremely well. My areas of expertise include product, architectural and interior photography however I'm also very proficient in landscape, art and studio based photography. This can range from food photography to fashion and set building to create unique looks for each shoot. Having a long history of working with commercial and local clients has provided me with a great insight into customer care and managing client expectation with a professional demeanour

EXPERIENCE

CEO AND CREATIVE PHOTOGRAPHER - 02-2011/current PHOTOGRAPHY BY IMRAN

Since the success of my work used by Microsoft online to create Windows 7 and 8 desktop themes, I decided it was time to expand on my passion. This is where Photography By Imran was born. The main area of speciality is art landscapes and architecture photography. Using hi end equipment to produce art and sell this on my web site. This includes exclusive collectors books, calendars and cards. I also document my travels and create BTS video for YouTube.

CO CEO AND CREATIVE PHOTOGRAPHER - 06-2010/ 06-2014 RM STUDIOS

RM Studios was born out of frustration of the lack of photography support and network in the area. A fellow photographer and myself decided to tackle this and it became an instant local success. We led free and low cost courses and training in photography and running a studio. We covered many commercial commissions, which range from products such as jewellery, clothing, furniture, food and interiors to name some. We also hosted annual network events for creatives to get together and network. The business was let go due to a change in direction for my business partner.

EDUCATION

BTEC NATIONAL DJ TECHNOLOGY - 09-2000/ 09-2001 LEEDS COLLEGE OF MUSIC

Learning the history of modern music and learning music production using computer based software and hardware. The course came to an end due to lack of funding.

GNVQ ADVANCE IT - 09-1998/ 09-2000 BRADFORD COLLEGE

Learning many aspects of computers and networking. This has led me to be able to trouble shoot problems and resolve them effectively. I build my own PC and occasionally build PC's for others too.
